

## Index to Volume 37

Anderson, M. R.—

See Sevier, M. E. 709

### Applied physics

Airborne laser technique for determining  
sea water turbidity 75

### Astronomy and astrophysics

Radio supernova remnants 321

Toroidal flow in axisymmetric pulsar  
magnetospheres 105

### Atomic and molecular physics and spectroscopy

Allowed and forbidden  $n = 2-2$  transitions  
of the elements Kr and Mo 601

Atomic X-ray transition probabilities: a  
comparison of the dipole length, velocity  
and acceleration forms 45

Cross sections for electron scattering in  
nitrogen 487

Electron transport and rate coefficients in  
Townsend discharges 593

Generalized Einstein relation and negative  
differential conductivity in gases 35

L-subshell X-ray production by 100–250  
keV/a.m.u. ions 475

Model calculations of negative differential  
conductivity in gases 23

Baggaley, W. J.—

Changes in the frequency distribution  
characteristics of ionosonde  $E_s$  parameters  
during major meteor activity 561

Nocturnal sporadic-E activity at two  
Southern Hemisphere stations over three  
solar cycles 231

Structural changes in ionosonde  $E_s$  over  
three solar cycles 705

Bajenov, N.—

See Collings, A. F. 549

Bakich, A. M., Peak, L. S., and

Wearne, N. T.—

An absolute measurement of Cherenkov  
emission by relativistic muons in pure  
water 567

Barker, F. C.—

E1 decay of the first excited state of  
 $^9\text{Be}$  267

Low-lying negative-parity levels of  $^{17}\text{N}$   
and  $^{18}\text{N}$  17

Ratio of the  $^4\text{He}(\gamma, p)^3\text{H}$  and  $^4\text{He}(\gamma, n)^3\text{He}$   
cross sections 583

Bauhoff, W., and Morrison, I.—

Proton inelastic scattering in the interacting  
boson model: formalism and application  
to the Ge isotopes 463

Baxter, A. M.—

See Fewell, M. P. 239

Vermeer, W. J. 123, 273

Bell, M. G., Cheetham, A. D., Hamberger,  
S. M., Hogg, G. R., Hollis, M. J.,  
How, J. A., Kuwahara, H., Morton,  
A. H., Sharp, L. E., Whitbourn, L. B.,  
and Vance, C. F.—

The LT-4 tokamak. I. Description of the  
apparatus and its operation 137

Betteridge, G. P.—

Tight-binding central interaction model for  
the band structure of silicon 407

Bhattacharyya, D. P., Pal, P., and

Mukhopadhyay, A.—

Derivation of muon intensities in sea-water  
depths up to 1400 M.W.E. from the  
recent primary cosmic ray spectrum 575

Blevin, H. A., and Fletcher, J.—

Electron transport and rate coefficients  
in Townsend discharges 593

Burden, C. J., and Tassie, L. J.—

Additional rigidly rotating solutions in the  
string model of hadrons 1

Burman, R. R.—

Toroidal flow in axisymmetric pulsar  
magnetospheres 105

Burnett, S. M.—

See Vermeer, W. J. 273

Callaghan, P. T.—

Pulsed field gradient nuclear magnetic  
resonance as a probe of liquid state  
molecular organization 359

Campbell, S. J.—

An introduction to Mössbauer studies of  
magnetic materials 429

Cheetham, A. D.—

See Bell, M. G. 137

Christos, G. A.—

Some aspects of the U(1) problem and the  
pseudoscalar mass spectrum 241

Trivial solution to the domain wall  
problem 119

Clay, R. W.—

Cosmic ray anisotropy and the knee of the  
energy spectrum 97

- Clay, R. W., and Dawson, B. R.—  
Examination of a proposed technique for  
the economical detection and analysis of  
ultra-high energy cosmic ray  
showers 309
- Clay, R. W., Gerhardt, P. R., and Liebing,  
D. F.—  
Observation of an excess of cosmic ray  
showers from the direction of  
Centaurus A 91
- Cohen, D. D.—  
See Harrigan, M. F. 475
- Collings, A. F., Bajenov, N., and Inglis,  
B. D.—  
The electrical resistance of the lower  
consolute system 2, 6-lutidine-water 549

#### Condensed matter

- Collision-induced spectra at a gas-solid  
interface 63
- Determination of operational parameters in  
the conventional X-ray diffractometry of  
a small single crystal 55
- Experimental value of  $f(220)$  for  
copper 651
- Improved technique for examining Bragg  
reflections in  $\Delta\omega$ ,  $\Delta 2\theta^{(n)}$  space 657
- Introduction to Mössbauer studies of  
magnetic materials 429
- Low energy ion-surface interaction—  
atomic physics in an ordered atom  
environment 389
- Molecular dynamics of the phase transition  
in compressible ammonium chloride 667
- Molecular dynamics of the phase transition  
in deuteroammonium chloride 67
- Phonon dispersion relations for caesium  
thiocyanate 287
- Power-law form of the temperature  
dependence of the magnon specific heat  
 $C_M(T)$  in linear, planar and spatial  
antiferromagnets 305
- Pulsed field gradient nuclear magnetic  
resonance as a probe of liquid state  
molecular organization 359
- Rotational motion of the  $\text{NH}_4^+$  ion in  
ammonium chloride 197
- Solar electricity and recent progress in thin  
film photovoltaics 449
- Tight-binding central interaction model  
for the band structure of silicon 407

#### Cosmic rays

- Absolute measurement of Cherenkov  
emission by relativistic muons in pure  
water 567

- Cosmic ray anisotropy and the knee of the  
energy spectrum 97
- Derivation of muon intensities in sea-water  
depths up to 1400 M.W.E. from a recent  
primary cosmic ray spectrum 575
- Observation of an excess of cosmic ray  
showers from the direction of  
Centaurus A 91
- Proposed technique for the economical  
detection and analysis of ultra-high  
energy cosmic ray showers 309

- Crompton, R. W.—  
See Petrović, Z. Lj. 23

- Dawson, B. R.—  
See Clay, R. W. 309
- Durbin, J. M.—  
See Mills, B. Y. 321

- Elcombe, M. M.—  
See Irving, M. A. 287

#### Electromagnetism and optics

- Gyromagnetic emission and absorption:  
approximate formulas of wide  
validity 675
- Two procedures for phase estimation from  
visibility magnitudes 209

- Esat, M. T.—  
See Vermeer, W. J. 123, 273

- Fewell, M. P.—  
See Vermeer, W. J. 273
- Fewell, M. P., Spear, R. H., Zabel, T. H.,  
and Baxter, A. M.—  
Corrigendum to: Electric quadrupole  
excitation of the first excited state of  
 $^{11}\text{B}$  239

- Fletcher, J.—  
See Blevin, H. A. 593

#### Fluid dynamics and plasma physics

- Dispersion in a relativistic quantum electron  
gas.  
I. General distribution functions 615  
II. Thermal distributions 639
- Horizontal wave number dependence of  
type II solutions in Rayleigh-Bénard  
convection with hexagonal planform 531
- Influence of vertical vorticity on thermal  
convection 179
- Modelling reactive gas flows within shock  
tunnels 157

- Power and momentum relations in rotating magnetic field current drive 509
- Relationship between r.f. current drive and the measured loop voltage in tokamak r.f. heating experiments 495
- Steady currents driven in a conducting sphere placed in a rotating magnetic field 521
- The LT-4 tokamak. I. Description of the apparatus and its operation 137
- General relativity and gravitation*
- Comment on the Brans-Dicke-Kasner solution 317
- Gerhardy, P. R.—  
See Clay, R. W. 91
- Glass, R.—  
Allowed and forbidden  $n = 2-2$  transitions of the elements Kr and Mo 601
- Haddad, G. N.—  
Cross sections for elastic scattering in nitrogen 487  
See also Petrović, Z. Lj. 23
- Hamberger, S. M.—  
See Bell, M. G. 137
- Haneman, D.—  
Solar electricity and recent progress in thin film photovoltaics 449
- Harrigan, M. F., Spicer, B. M., and Cohen, D. D.—  
L-subshell X-ray production by 100-250 keV/a.m.u. ions 475
- Hayes, L. M.—  
See Melrose, D. B. 639
- Hayes, L. M., and Melrose, D. B.—  
Dispersion in a relativistic quantum electron gas.  
I. General distribution functions 615
- Hinds, S.—  
See Vermeer, W. J. 123
- Hogg, G. R.—  
See Bell, M. G. 137
- Hollis, M. J.—  
See Bell, M. G. 137
- How, J. A.—  
See Bell, M. G. 137
- Hugrass, W. N.—  
Power and momentum relations in rotating magnetic field current drive 509  
The relationship between r.f. current drive and the measured loop voltage in tokamak r.f. heating experiments 495
- Hugrass, W. N., and Kirolous, H. A.—  
The steady currents driven in a conducting sphere placed in a rotating magnetic field 521
- Inglis, B. D.—  
See Collings, A. F. 549
- Ionospheric physics*
- Changes in the frequency distribution characteristics of ionosonde  $E_s$  parameters during major meteor activity 561
- Nocturnal sporadic-E activity at two Southern Hemisphere stations over three solar cycles 231
- Structural changes in ionosonde  $E_s$  over three solar cycles 705
- Irving, M. A., Elcombe, M. M., and Smith, T. F.—  
Phonon dispersion relations for caesium thiocyanate 287
- Joshua, S. J.—  
Power-law form of the temperature dependence of the magnon specific heat  $C_M(T)$  in linear, planar and spatial antiferromagnets 305
- Kirolous, H. A.—  
See Hugrass, W. N. 521
- Koerber, B. W.—  
See Phillips, D. M. 75
- Kuehner, J. A.—  
See Vermeer, W. J. 123
- Kuwahara, H.—  
See Bell, M. G. 137
- Larkins, F. P.—  
See Quiney, H. M. 45, 709
- Li, Y.-G., and Lo, S.-Y.—  
Nucleus-nucleus elastic scattering at ultra-high energies 255
- Liebing, D. F.—  
See Clay, R. W. 91
- Little, A. G.—  
See Mills, B. Y. 321
- Lo, S.-Y.—  
See Li, Y.-G. 255
- Lopez, J. M.—  
See Murphy, J. O. 179
- Lopez, J. M., and Murphy, J. O.—  
Horizontal wave number dependence of type II solutions in Rayleigh-Bénard convection with hexagonal planform 531
- Lorenz-Petzold, D.—  
Comment on the Brans-Dicke-Kasner solution 317

- MacDonald, R. J., and O'Connor, D. J.—  
Low energy ion-surface interaction—  
atomic physics in an ordered atom  
environment 389
- Mackenzie, J. K., and Mathieson, A. McL.—  
The experimental value of  $f(220)$  for  
copper 651
- Mahanty, J.—  
Collision-induced spectra at a gas-solid  
interface 63
- Mathieson, A. McL.—  
A guide to the determination of operational  
parameters in the conventional X-ray  
diffractometry of a small single  
crystal 55  
*See also* Mackenzie, J. K. 651
- Mathieson, A. McL., and Stevenson, A. W.—  
An improved technique for examining  
Bragg reflections in  $\Delta\omega, \Delta 2\theta^{(4)}$   
space 657
- Melrose, D. B.—  
*See* Hayes, L. M. 615  
Robinson, P. A. 675
- Melrose, D. B., and Hayes, L. M.—  
Dispersion in a relativistic quantum electron  
gas.  
II. Thermal distributions 639
- Mills, B. Y., Turtle, A. J., Little, A. G., and  
Durdin, J. M.—  
A new look at radio supernova  
remnants 321
- Mitchell, L. W.—
